## Place

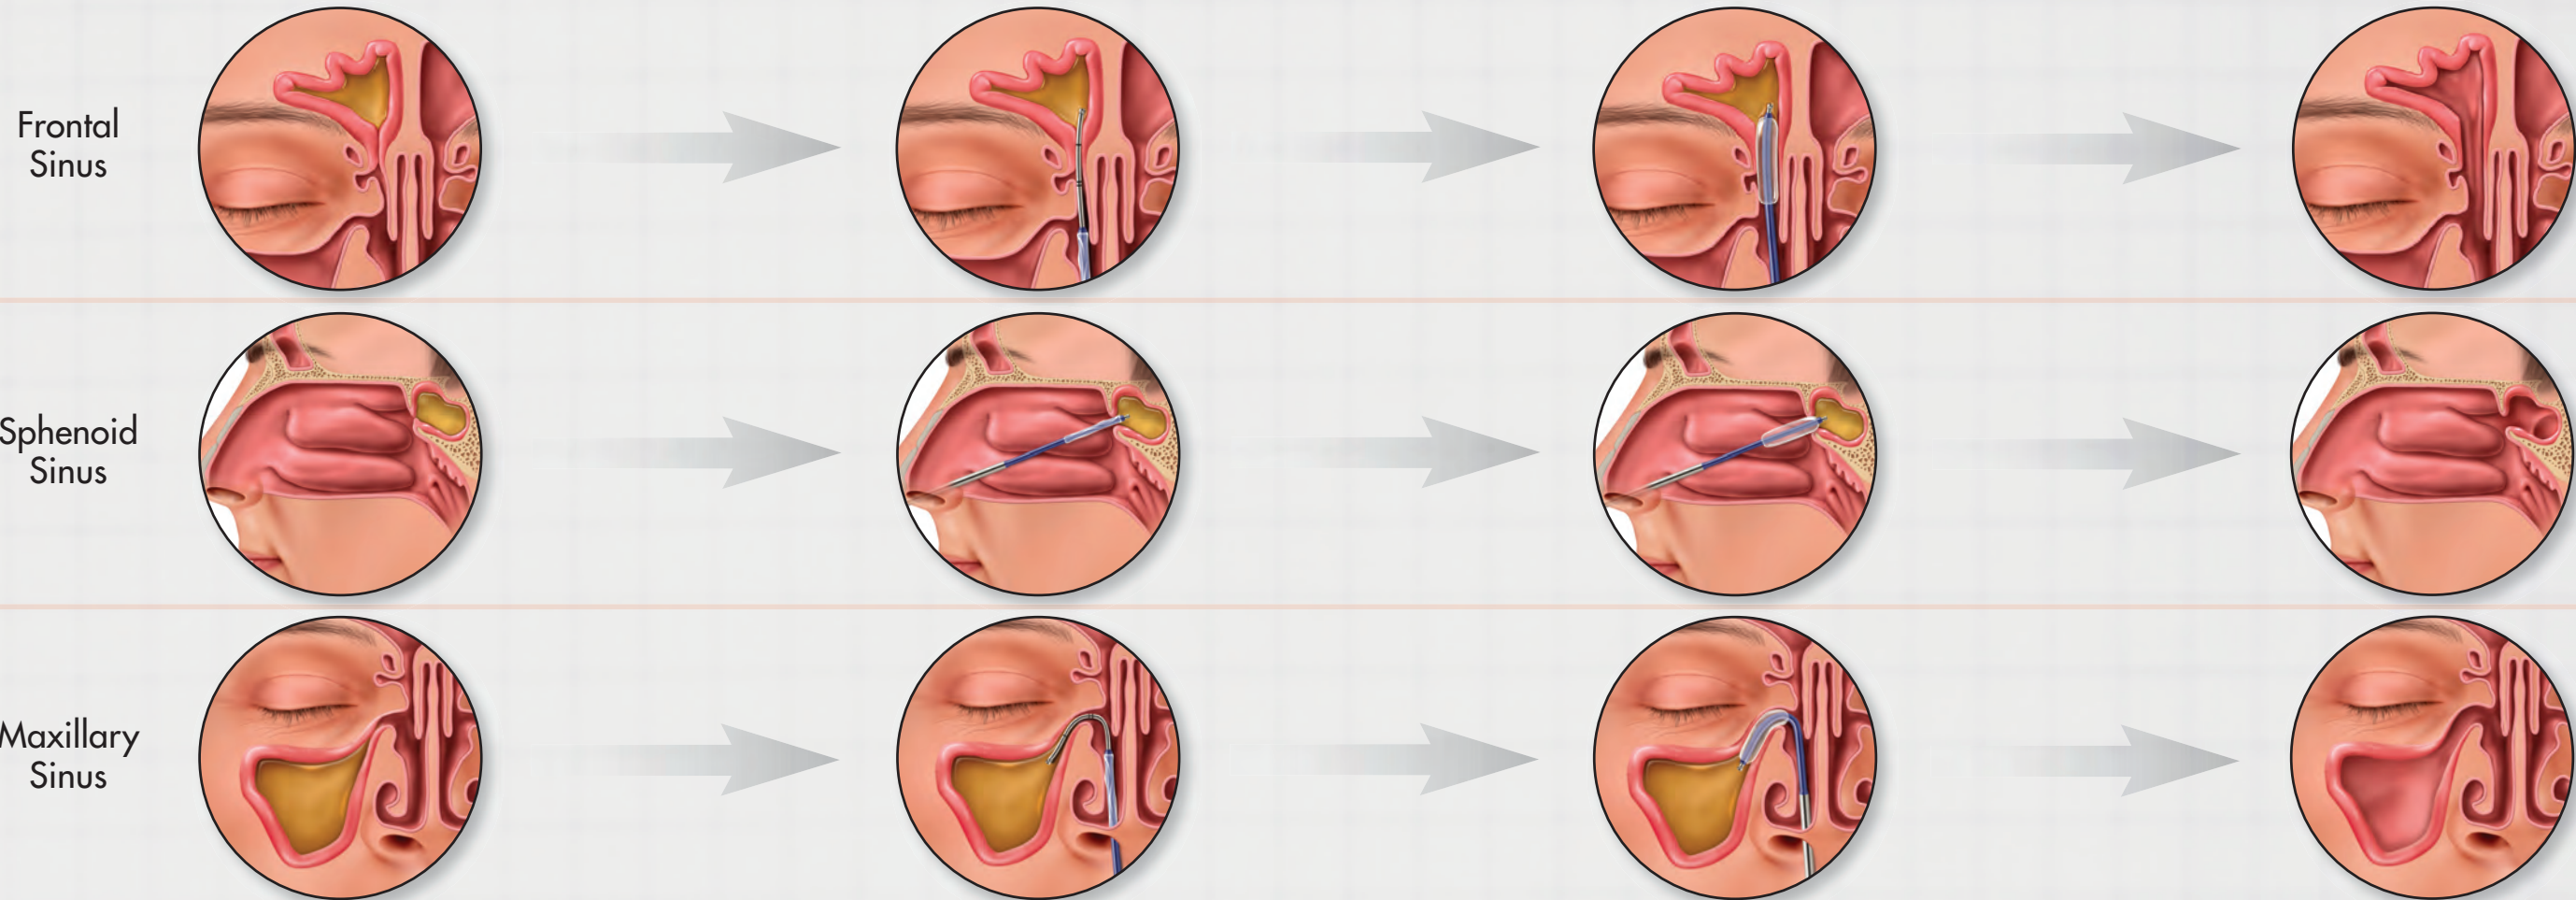

The XprESS device will be positioned

## Dilate

Your physician will inflate the small balloon and dilate the treatment area

## Remove

The XprESS device will be removed

**Multiple Sinuses / One Solution**

### How a little balloon restores sinus drainage

Balloon sinus dilation is an innovative, minimally invasive procedure that uses small balloons, similar to those used to open blocked arteries, to reopen the sinus pathways, restore drainage and deliver immediate relief to sinusitis sufferers.

*To Learn More: Ask your physician if XprESS is right for you or go online to [www.lastingsinusrelief.com](http://www.lastingsinusrelief.com)*

Refer to XprESS Multi-Sinus Dilation Tool IFU for complete instructions, indications, contraindications, warnings, precautions, and adverse events.

CAUTION: Federal (USA) law restricts this device to sale by or on the order of a physician. 1732-047rA 02/11
